Bogotá, Colombia

QA ENGINEER

Passionate about test automation with experience in designing and developing manual tests and automation scripts. Successfully automated numerous test cases, improving test coverage and efficiency. Skilled at collaborating with teams to streamline test execution. Committed to continuous learning and enhancing automation skills. Dedicated to making a significant impact in organizations by delivering outstanding achievements and contributing to team success.

MOST RECENT WORK EXPERIENCE

Testing Intern at Endava

July 2022 – January 2023 · 6 mos. [Bogotá, Colombia] [Business Insurance, B2B]

ACCOMPLISHMENTS

- Actively participated in team meetings to contribute insights and collaborate effectively with scrum methodology.
- Engaged in all phases of the application development lifecycle, ensuring comprehensive involvement through test case creation and design, detecting bugs and tracking them to resolution, performing regression testing, and designing automated test cases.
- Demonstrated experience in implementing and maintaining both manual and automation test cases using Java and JavaScript, resulting in streamlined testing processes and improved efficiency applying some black box techniques.
- Collaborated closely with the Product Owner, Developers, Business Analysis and Testers performing static testing grooming the user stories requirements and their acceptance criteria.
- Conducted comprehensive regression testing through a combination of manual and automated approaches, ensuring thorough validation of software functionality and stability.
